## Simple and Precise Imaging

The FMT tube stand is easy to use and features a continuous digital angulation display. SID is visible when the system is positioned at 40 or 72 in (102 or 183 cm) to the wallstand or 40 in (102 cm) to the table. Conveniently positioned finger-tip control buttons, and powerful magnetic locks ensure steady, accurate tube head positioning. In addition, it only requires a ceiling height of 7 ft 3 in (221 cm) making it one of the lowest ceiling height requirements in the industry.

## RT100 Four-Way Float Top Table

The RT100 table features a 700 lbs (318 kg) patient weight capacity and a stain-resistant floating tabletop which glides freely on a precision roller bearing system. Float top movements are safely controlled by heavy-duty electric locks, activated by a conveniently placed foot treadle release. The standard cassette tray accommodates your choice of 14 x 17 in (35 x 43 cm) or 17 x 17 in (43 x 43 cm) detector with ease. Its all-steel structure and welded base provides maximum strength and reliability. In addition, the RT100's base can be used to store Anthem generator electronics, making it a great space saver for tight room layouts.

## Accessories and Upgrades

### ▶ Table Side Handgrips

These sturdy handgrips can be mounted along the entire length of both sides of the tabletop to enhance patient safety.

### ▶ Lateral Cassette Holder

This adjustable holder can be mounted along both sides of the tabletop allowing for access to a variety of cross-table lateral views.

### ▶ Compression Band

This compression device is used to safely secure patients to the tabletop.

## VS100 Wall Stand

The ultra-compact VS100 vertical stand is powered by an electric lock release handle and dual counterweight cables for added patient safety. Its expansive vertical travel of 58 in (148 cm) enables a complete range of exams from skull to weight-bearing knee and ankle exams. Its wall hugging design saves space in small rooms.

## EV800 Elevating Four-way Float Top Table

The durable EV800 elevating four-way float top table delivers outstanding safety and usability. Featuring an exclusive four-point lift system and exceptionally quiet motor-drive, its smooth, scratch resistant table top lowers to a height of just 22 in (56 cm) to ensure stress-free patient transfers and adjustments. Offering a high patient weight capacity of up to 800 lbs (363 kg), stable continuous movement is possible through conveniently placed recessed foot treadles and table-side controls, suitable for increasing technologist performance and satisfaction.

Table-side Hand Controls

## VS300 Ergonomic Wall Stand

The reliable VS300 wall stand utilizes electromagnetic 'fail-safe' locks to maintain operator confidence throughout the imaging procedure. Full receptor movement to the floor, patient-side handgrips and optional overhead handgrips promote efficient upright exams without placing unnecessary strain on the patient.

Designed for convenience, the VS300 technologist handgrip permits relaxed vertical travel by angling with the operator's wrist as the image receptor is raised or lowered.

## Rotating Detector Tray \* optional upgrade

The easy-to-use rotating tray enables manual rotation of the DR detector for use inside both table and wall stand. The stable one-handed operation supports fast portrait-to-landscape positioning without ever removing the detector from the tray. Fully extended steel slides activate locking mechanisms to assure detector protection when loading and unloading. Designed to accommodate a wide array of ISO 14 x 17 in cassette-sized detectors.
